

POWDER COAT INFORMATION

Arch Finishing Systems offers three high performance powder coatings in a variety of colors, glosses, textures and metalizing to meet your every need. However, should there be a special requirement regarding (color, resin/type, or reflexivity) other than those listed, we can meet your challenge. We can match any decorative combination of color, gloss, texture, or metalizing by computerized spectrophotometer analysis. Whatever the parameters, we have the capability to service the customer. Our commitment to excellence is not only in resin formulation, but also by our superior pre-treatment. The use of a computerized wash system, choice of the finest chemicals possible, heavier disposition weights and increase in the stage quantities highlight our quality. This commitment is carried through even further by day-to-day chemical testing, supply monitoring, oven temperature checks, pre-project sampling, color and gloss analysis and product laboratory tests - all standard in our quality control program. Contact your representative or local branch for more information, specifications, and color samples.

ARCHKOTE 1000 is a polyester powder with medium gloss, exceed AAMA 2603-02 specifications and comes with a one-year warranty. We offer #83 White and 12 standard colors (see list below) under the finish code #89 in this catalog.
