

Common Compatible Sealants and Glazing Components

This list is compiled of sealants tested as compatible to Arch Aluminums standard polysulphide and silicone secondary seals. This list is only representative of the samples tested. Arch Alumium has no control over the formulation or any chages thereto of these products. Critical applications or structurally glazed systems should be re tested as part of routine compatibility review. The user is responsible for verification of compatibility and suitability of any products used in the glazing process

Dow Corning 795

Dow Corning 995

GE Silicone 1200

Pecora 895

Tremco Spectrum II

Tremco Spectrum III

Tremco Dymonic

Neoprene setting blocks

Silicone setting blocks

Neoprene gasket

EPDM Gasket

Santoprene gasket
